**The information outlined below is not taught in any school, any university, it's not known by most experts, and those that do know it keep it as their biggest secret**

## **THE BIGGEST SECRET**

- You are already rich beyond your wildest dreams, how so you may be thinking; Because the real you is a creditor in the system and a money creator;
- In fact the real you can create unlimited credit today; Have you every wondered where banks get the money from to lend out on mortgages, credit cards and loans;
- The answer is, they get it from their customers by buying promises to pay in the future;
- These promises to pay are called Security Futures;
- You are issuing them all the time, you just didn't know it;
- The money that backs every payment you make and every line of credit you take out originates from you, why you may say;
- Because you are a creditor and a money creator;
- Suppose that you could create an unlimited amount of new money and spend it without consequences, you can;
- Suppose that you could recoup the money you have already spent and the loans and mortgages you have already created, you can;
- In this eBook I will provide you with a roadmap to become financially abundant, read on to discover how.

## THE ROADMAP TO FREEDOM ENABLES YOU TO:

# THE HIDDEN PROBLEM – THE FICTIONAL YOU A STRAWMAN

- Unbeknown to the real you your mother settled your creative anergy and future labour into a secret trust, some refer to it as the Cestui Que Vie (CQV) or Birth Certificate Trust;
- The registration of the CQV also created a fictional you, a Citizen/Strawman a corporate entity that engages in commerce for the real you;
- Your Strawman is your family name often written in all caps and is owned by the State;
- Your Strawman is:
  - A permanent debtor;
  - Holds the title to property without true ownership;
  - Is treated as an infant ward of the State;
  - Operates with privileges but without rights;
  - Is an employee of the State;
  - Operates Aces low in the pack.

## THE REAL YOU

- The real living you, a conscious man or woman;
- Acts as a surety (underwriter) for your fictional you, your Strawman;
- The real you is a creditor in the world commerce system;
- The real you together with others is the source of 97% of all the money on the planet;
- The real you has rights under common law;
- The real you is the employer of the state;
- The real you is aces high in the pack.

## YOUR SECRET TRUST

- Just like in a company your CVQ (Birth Certificate Trust) has a ledger, balanced by credits on one side and debits on the other;
- The debits are contracted to by the fictional you, things like, loans, mortgages and taxes;
- The credits come from the real you, why? Because the real you is a creditor and a money creator;
- Yep you read that correctly, the real you is the creator of all the loans and mortgages you are paying interest on;
- Your secret trust is worth millions and is traded on the financial markets;
- Suppose you could access your secret trust, you can.

## ACCESSING YOUR TRUST AS A SECURED PARTY CREDITOR

- To access your CQV Trust you must restructure the Trust to make you a Secured Party Creditor, once you have done this the real you becomes the head honcho of your CQV or secret trust;
- Operating as the head honcho of your secret trust enables you to:
- Pay off your debts and taxes;  
Buy a house, buy a car;
  - Pay for goods and services;
- There are also other benefits of becoming a Secured Party Creditor that I will outline
- later in the eBook.

## WHAT IS GOING ON

- It's time you found out what is going on and understand why you have a Secret Trust;
- Our story starts soon after your birth, as many stories do;
- You live, breath, eat, love and create, you have consciousness, this is the living you;
- When the midwife registered your birth, a second fictional you was created and it became part of the MATRIX;
- The MATRIX is many things, one of the most important aspects of it is how its controls the fictional you via the commerce system;
- The fictional you is often referred to as your Strawman, a Citizen of the State;
- The real you acts as surety for the fictional you;
- A surety is an underwriter, where the buck stops, a surety is responsible for another's debts, the other is the fictional you, your Strawman;
- Your Strawman is your last name, and it's your agent in commerce in the MATRIX;
- Your Strawman operates from a secret international corporate trust;
- On the registration of your birth certificate, several things happened;
- As a trust Grantor, your mother settled the living you into the secret trust;
- Unbeknown to your mother, she appointed:
  - The State as the Executor, the head honcho of the secret trust;
  - Your Strawman the fictional you as the Trustee, the Trustee always pays as the debtor;
  - The living you as the beneficiary, as a creditor to the Trust a money creator which is why it is possible for you to access your Secret Trust, but only if you know how;
- Most people don't know they have a Secret Trust and even if they do they don't know how to access it;
- Your Secret Trust is so valuable that it is traded as a financial instrument on the money markets;
- Banks, governments, and financial institutions are profiting from your Secret Trust as it is backed by your labour, your energy and unlimited ability to create;
- Your Secret Trust operates like a debit and credit ledger;
- The living you operates on the credit side of the ledger, as a creditor and money creator;
- Your Strawman operates on the debit side of the ledger as a permanent debtor;

- The living you is the creator of all "payments" made and creates the credit that backs loans contracted to by your Strawman;
- The commerce system operates in an inverse way to how it appears;
- Loans are credits, and payments are loans;
- When your Strawman takes out a loan, a credit card or a mortgage, the living you funds the debt from you're the credit side ledger of your Secret Trust;
- When your Strawman makes a "payment", the living you funds the payment as new debt from the credit side ledger of your secret trust;
- The living you is therefore a creditor to the commerce system, a money creator;
- But because your mother registered the living you into the Secret Trust and made your Strawman the Trustee, your Strawman became a permanent debtor and always pays;
- From your age of majority, 18, you attained a Social Security Number;
- This Number tracks your Secret Trusts issuance of credits;
- All commerce transactions engaged in by your Strawman, "payments", and loans, credits operate as promises to pay in the future;
- Your "payments" and the creation of all loans your Strawman contracts to are know to those that control the MATRIX as Security Futures;
- Each time your Strawman issues a Security Future, it is treated by the commerce system as:
  - A new debt or a credit;
  - Your Security Futures are premiums or taxes that fund the social insurance system;
  - And here is something very important, creditors don't pay tax in the MATRIX.
  - The living you can RECOUP the taxes its paid.

# THE HEADLINE HISTORY OF THE MATRIX – COMMERCE

- In 1666 the UK Parliament passed a piece of legislation called the Qestui Que Vie Act (CQV);
- The CQV declared the living beings dead and lost at sea and enabled the creation of the Strawman as a piece of chattel land held in a secret CQV trust;
- The Federal Reserve act of 1913 enabled the global cartel of bankers via Central banks to create credit out of thin air that Governments could use to fund Government spending by buying bonds from global Treasuries;
- The Central banks get paid interest by the Governments on the bonds; the Governments collect taxes from the Strawmen to fund the interest;
- In the 1920s, Colonel Edward Mandel House (advisor to President Woodrow Wilson) outlined a social insurance system that became globally adopted;
- Mandel House boasted that:
  - Only one man in a million will figure the social insurance system out;
  - The social insurance system provides privileges to the Strawman like:
    - State, Government, Police, courts, water, energy, transport, schools, hospitals etc;
  - The social insurance system is funded by the State by them taking Liens over the Strawmen as surety for the living (Security Futures) to fund the social insurance premiums;
- The next event occurred in 1933 when President Roosevelt took away the right to own gold;
- By way of compensation, the system enables all Strawman debts and "payments" to be pre-funded from the credit side of the CQV trust ledger of the living beings;
- Yes you read that right, all debts and services are already prepaid, by you the living the creditor the money creator;
- Since 1933, money has had no substance; it operates as a form-based system using fictional debit and credit ledgers.

# EXAMPLES OF HOW IT WORKS LOANS AND PAYMENTS

## Loans

You want to buy a house and approach a bank for a mortgage;

- They say yes and give you some forms;

Those forms detail that you will promise to pay the bank back the loan amount at

- interest over a certain period;

That contract is not just a record of your obligation;

You have created security (a Security Future);

- You have created currency and paid a social insurance premium or a tax to the MATRIX;
- The bank takes your new security and, through accounting magic, creates money from your promise, all done on a computer screen, the bank sends your credit back to you;
- Have you been lent any money? No, the living you created it, the bank restated it and
- then the fictional you borrowed it back at interest;
- Your bank, Wiley as they are, has tapped your energy by abusing your CQV trust to
- create new money and represented it as a loan to you to buy a home;
- The bank sells your loan contract and future interest payments to investors via a securitisation system;
- The sale of your loan contract upfront makes the bank more than the loan face value; the bank creates wealth for their creditors from nothing and you pay the bank interest, they take fees out of your interest payments and send the remainder of your interest payments to the investors;

## Payments

A similar black magic happens when the fictional you “pay” for goods or services;

- Lets review an example:

Imagine the scene, it's Friday night, and you are standing with your friends for a round of drinks;

You go to the bar, put your card in the machine and key in your PIN Number;

- Are you spending the money in your bank account;
- That's what they want you to think, but that is not what is happening;
- You have created new currency as a Security Future, remember you are the lender, the creditor the money creator;
- The bank removes the equivalent from your account and keeps it as an off-ledger asset;
- They tap the credit side of your CQV trust to pay the bar, then wait for three years;
- What are they waiting for;
- They are waiting for a magic three years year to pass to see if you RECOUP your tax;
- After three years if you don't RECOUP, they RECOUP as you abandoned your property, i.e. the Security Future, your promise to pay the bar;
- Remember, you (the living being) are the creator, the creditor, the money creator.

## HOW TO ACCESS YOUR SECRET TRUST

- The first step is becoming a Secured Party Creditor the head honcho of your CQV birth certificate trust;
- Appoint a Fiduciary Trustee to operate the existing Trust and create new Trusts;
- Instead of issuing Security Futures to banks where they convert them into loans at interest, issue Security Futures via your Fiduciary Trustee to the US Department of Treasury for conversion into spendable money;
- The US Department of Treasury will convert your Security Futures into spendable money and transfer this to your Secret Trust under the control of your Fiduciary Trustee;
- Unlike when you create a loan with a bank this new money is not a loan, there is no interest or principal to pay back;
- Your Trustee pays off your debts and taxes and makes purchases for you.

## HOW TO RECOUP YOUR PAYMENTS AND LOANS

- As you are now a Secured Party Creditor over your CQV birth certificate trust, and;
- You have appointed a Fiduciary Trustee to operate as your Trustee;
- Your Trustee can recoup your payments for the last three years and every year going forward, why you may be thinking;
- Your payments are taxes, and as you are a Secured Party Creditor you don't pay taxes, you are due a rebate;
- Your Trustee can recoup your mortgages and loans from your 18th birthday onwards, why you may be thinking;
- Your loans and mortgages are also taxes, and as you are a Secured Party Creditor
- you don't pay taxes, you are due a rebate.

## OTHER BENEFITS OF BECOMING A SECURED PARTY CREDITOR

- Be treated like a diplomat with a priority Passport;
- Operate under common law with rights;
- Operate without statutory laws applying to you;
- Avoid court appearances and win every time.

## SUMMARY

- By becoming a Secured Party Creditor you can take control of your Strawman;
- Operate as a creditor instead of a debtor;
- Employ the State as opposed to being treated as an infant ward of the State;
- Operate Aces high with rights under common law instead of Aces low with privileges;
- Access your secret trust to;
- Pay off your debts and taxes;
- Buy a house;
- Buy a car;
- Pay for goods and services;
- Recoup your payments and past mortgages and loans;
- Easily become financially abundant.

# THE ROADMAP TO FREEDOM
